BONDED RETAINER

Today you have been fitted with a Bonded Retainer placed behind your front teeth.

These retainers require on-going maintenance. We ask that you check the bonding material or “buttons” that holds these retainers in place, very often and carefully. Should any of the buttons require replacement, (if it has chipped off, or come away from any tooth) call us immediately.

We recommend these retainers be in place permanently. Please note that should you decide to remove these retainers there is always a chance that some shifting of the teeth may occur. We therefore cannot hold ourselves responsible for poor maintenance or unretained teeth.

Please ensure that you pay close attention to cleaning your retainers involving brushing, flossing and regular dental cleanings with your dental professional.

If you have any concerns please feel free to contact any of our staff and we will be glad to help you.
